CERTIFICATE

This is to certify that the declaration statement made by the student is correct to the best of my knowledge and belief. He /She have completed this Project under my guidance and supervision. The present work is the result of his/her original investigation, effort and study. No part of the work has ever been submitted for any other degree at any University. The Project is fit for the submission and partial fulfillment of the conditions for the award of Bachelor of Technology degree in Computer Science and Engineering from Lovely Professional University, Phagwara.

Signature of Supervisor
(Arwinder Dhillon)

Assistant Professor
Department of Computer Science & Engineering
Lovely Professional University, Punjab
Date: 17 April, 2024

ACKNOWLEDGEMENT

I would like to acknowledge that I, **Thanush Kodi N**, have carefully reviewed and accepted the terms of the declaration for Continuous Assessment 3. I confirm that the work presented in this assessment is entirely my own effort and has been conducted with academic integrity. I have taken care to ensure that all sources used for references, quotes, and data have been appropriately acknowledged.

Furthermore, I acknowledge the significance of academic honesty and the consequences associated with any form of dishonesty. I affirm that this assessment reflects my genuine understanding and analysis of the subject matter and has not been submitted for assessment in any other course or institution.

Thanush Kodi N

INTRODUCTION

This project focuses on the development of a dynamic cake ordering website utilizing HTML and CSS aimed at delivering an engaging and user-friendly experience for customers seeking delicious cake options. HTML (Hypertext Markup Language) is employed to structure the content, ensuring a clear and organized presentation of essential information, such as menu items, prices, and promotional offers. CSS (Cascading Style Sheets) enhances the visual appeal of the website, allowing for the integration of vibrant images, responsive design, and an intuitive layout that adjusts seamlessly across devices. The project showcases the effective use of semantic HTML for better accessibility and SEO optimization while employing CSS techniques for styling, including flexbox .

Our website, NexusCakes.com, has grown to be designed with the ease of the cake ordering process. Our section is navigable such that visitors may browse the gallery, view flavor options, and reach out to us for consultation or quotes. Nexus Cakes creates a special celebration through an amalgamation of two aspects: delicious flavors of cakes and stunning aesthetics they bring along.

TECHNOLOGY USED

The following technologies are employed in this project:

- **HTML:** The backbone of the website, providing the structure and layout.
- **CSS:** Used for styling the website
 - **Flexbox and Grid Layouts:** CSS techniques used for layout structuring.
- **Google Fonts:** To enhance the visual typography of the site, creating a pleasant reading experience.

WORKFLOW

Nexus Cakes, my workflow begins with planning and organizing the website's structure and design. I start by sketching out the layout and deciding on essential elements like homepage banners, product categories, and navigation menus to ensure a user-friendly experience.

1. Home Page

- **Purpose:** The Home Page is the landing page, designed to captivate visitors with visually appealing images of cakes and highlight the best-selling or featured items.
- **Features:**
 - ✚ Displays various categories of cakes and offers.
 - ✚ Includes navigation links to other sections like the home, cakes, wish lists, orders and contact us.
 - ✚ Contains a call-to-action for browsing section to search cakes.

2. Cakes

- **Purpose:** The cakes page will help the user to pick their favourite flavour to order them
- **Features:**
 - ✚ This page contains bulk of cake flavours in the flex direction row form which helps to pick view all the flavours easily and quickly

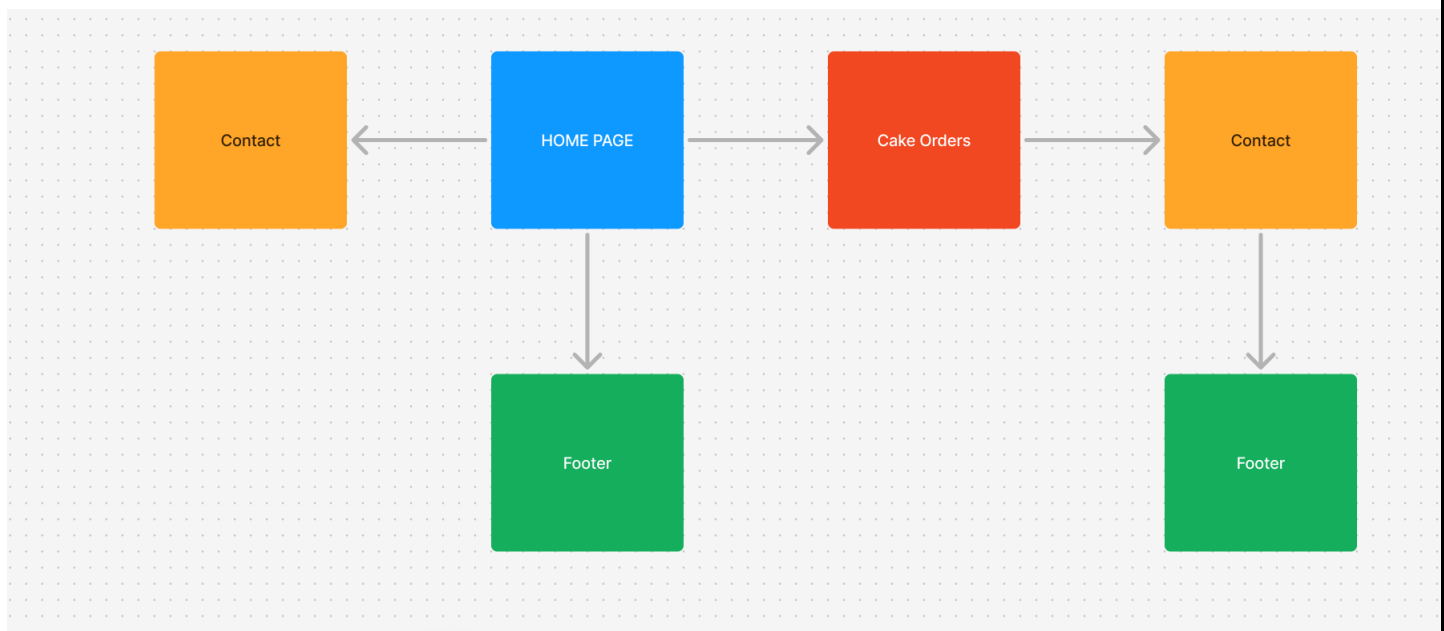

3. Contact Us

- **Purpose:** The contact us page will help the user to order the cakes
- **Features:**
 - ✚ This page contains name, email, phone number and a text area to contact for the order
 - ✚ They can write their customization for the cake in the space provided in the text area or they can ask the query about the current prices of the cake

4. Footer

- **Purpose:** This page contains the footer of the site, about section and copyright

Flowchart of the project (Workflow)

WORKING OF THE PROJECT

The cake website is designed to offer a complete e-commerce experience tailored to cake lovers. From browsing the menu to placing orders, the project leverages HTML and CSS to create a visually appealing and user-friendly platform. Below is a breakdown of how each feature of the website functions and integrates to provide a seamless experience for users.

1. Home Page

- **Purpose:** Serves as the main entry point, showcasing the website's offerings and guiding users through the product selection process.
- **Working:**
 - ✚ Displays a variety of cake, categorized by type and flavours.
 - ✚ Users can view flavours about each cake, such as its name.

2. Cakes Page

- **Purpose:** Serves as the main entry point, showcasing the website's offerings and guiding users through the product selection process.
- **Working:**
 - ✚ Displays a variety of cake, categorized by type and flavours.
 - ✚ Users can view flavours about each cake, such as its name.

3. Contact Us

- **Purpose:** This page will help the user to contact for the orders
- **Working:**
 - ✚ This takes the name, email id, phone no and note for the ordering

CONCLUSION: -

The Nexus Cakes website is designed to captivate visitors with a single, impactful main page that showcases the essence of my basic html and CSS skills. With visuals of our cakes, a straight forward layout, and easy navigation, this page gives users a taste of the quality and creativity that Nexus Cakes offers.

THANK YOU
